Lab 08 – Windows Services

General information

The aim of the project is to configure and use a specific service in Windows Server. As a specialist of this service, you will have to present the service, do a demonstration of that service and a documentation for your classmates. You will have to imagine a realistic scenario using the given service.

Topics

The following topics are available:

- Windows Backup and backup strategies (Bruno, Mustafa)
- Windows Server Update Services (Yona, Christophe)
- Remote Access – VPN & Direct Access (Marios, Donovan)
- Remote Desktop Services (Guilherme, Andrea)
- File and Storage Services (DFS, Workfolders) (Max, Sven, Eric)
- Print and Document Services ()
- Windows Deployment Services ()

To be delivered

The following elements are to be handed in at the end of the project:

- A detailed description of the scenario you implemented
- A documentation containing a detailed description of the implementation
- A presentation of the service and the implementation
- A live demonstration

Grading

The overall evaluation of the project is composed as follows:

- Project description 1p
- Documentation 2p
- Presentation 3p
- Live demonstration 2p

Timing

Start of the project

26 November 2025

Delivery of the project

19 December 2025
